GEODERMA

Contents Volume 83, 1998

Research Papers

Fragipan formation in loess soils: development of the Bryant hydroconsolidation hypothesis
A.M. Assallay, I. Jefferson, C.D.F. Rogers and I.J. Smalley 1

Soil-landscape modelling using fuzzy *c*-means clustering of attribute data derived from a Digital Elevation Model (DEM)
S. de Bruin and A. Stein 17

Determination of mineral surface area in relation to the calculation of weathering rates
M.E. Hodson, S.J. Langan and S. Meriau 35

Heavy metal distribution between soil aggregate core and surface fractions along gradients of deposition from the atmosphere
W. Wilcke and M. Kaupenjohann 55

A new model of the shrinkage characteristic applied to some Norwegian soils
P.A. Olsen and L.E. Haugen 67

Response of soil solution chemistry to recent declines in atmospheric deposition in two forest ecosystems in Berlin, Germany
B. Marschner, A. Gensior and U. Fischer 83

Early stages of podzolization under Corsican pine (*Pinus nigra* Arn. *ssp. laricio*)
G. Certini, F.C. Ugolini, G. Corti and A. Agnelli 103

Climate, organic matter and clay content relationships in the Pampa and Chaco soils, Argentina
R. Alvarez and R.S. Lavado 127

Relationship of soil properties to parent material and landscape position in eastern Madre de Dios, Peru
L.J. Osher and S.W. Buol 143

Book Reviews 167

Discussion Paper

Pedodiversity and global soil patterns at coarse scales (with Discussion)
J.J. Ibáñez, S. De-Alba, A. Lobo and V. Zucarello 171

Discussion and Authors' reply 193

Research Papers

Adsorption–desorption kinetics of potassium as influenced by temperature and background anions
L.S. Hundal and N.S. Pasricha 215

Organic carbon sequestration under chaparral and pine after four decades of soil development
S.A. Quideau, R.C. Graham, O.A. Chadwick and H.B. Wood 227

A geostatistical descriptor of the spatial distribution of soil classes, and its use in predicting the purity of possible soil map units
R.M. Lark and P.H.T. Beckett 243

Carbon and nitrate utilization in soils: the effect of long-term fertilization on potential denitrification
M. Šimek and J. Kalčík 269

The pH dependence of free ionic activities and total dissolved concentrations of copper and cadmium in soil solution
A.K. Salam and P.A. Helmke 281

Parameters for describing soil macroporosity derived from staining patterns
P. Droogers, A. Stein, J. Bouma and G. de Boer 293
Genesis and relationship of macromorphology and micromorphology to contemporary hydrological conditions of a welded Argixeroll from the Palouse in Idaho
R.A. Kemp, P.A. McDaniel and A.J. Busacca 309
Comparison of the composition of forest soil litter derived from three different sites at various decompositional stages using FTIR spectroscopy
G. Haberhauer, B. Rafferty, F. Strebl and M.H. Gerzabek 331
